PROFILE

Customer success and client management have been the thread running through my entire career. I build the structures that make CSM teams perform — playbooks, review rhythms, KPI frameworks — and I develop the people who run them. At EVA, I created the CSM department from scratch and drove +190% revenue in 2 years across 70+ accounts. **I've spent 20 years making people around me better. A team of 5 to 6 is exactly where I thrive.**
