

Paris, June 2026

Dear Hiring Team,

When I read Zei's job description, one phrase stood out: "you are the conductor, aligning teams, retaining clients, and guaranteeing an exceptional experience at every stage." That is a role I have been playing, in different forms, for the past 20 years.

At EVA, I created the CSM department from scratch across a network of 70+ accounts. I designed the KPI frameworks, the playbooks, the review rhythms and the individual coaching sessions. The result: **+190% network revenue growth in 2 years**. I've spent 20 years making people around me better. A team of 10 is exactly where I thrive.

Customer success and client management have been a constant throughout my career. From managing sponsors at Games Services, to key clients at Oxent, to brand and publisher relationships at Webedia, to connecting professional players with top partners at Prodigy. I have always had clients to develop and relationships to grow.

What draws me to Zei specifically is the mission. I have been managing my personal savings with a strong ESG and responsible investing focus for years, assurance-vie, PER, sectoral allocation, impact measurement. The stakes behind Zei's platform are not abstract to me. What Noël Bauza describes as a necessary transformation of the business model, I see it from the client side too. **A platform that simplifies ESG reporting so companies can focus on what really matters, I understand why they need it and I would be genuinely motivated to help them succeed.**

I have prepared a dedicated application page you can explore here: brochet.gg/zei

I am based in the Paris area, available immediately, and happy to discuss at your convenience.

Yours sincerely,

Julien Brochet
